PROJECTS

Personal Portfolio Website: Developed a comprehensive portfolio website to showcase web development projects.

Random GIF App - Developed a GIF app using React and custom hooks that displays random GIFs and includes a search feature for finding specific GIFs, enhancing user engagement and experience.

GitHub User Data Fetcher - Developed an app that retrieves user data from GitHub based on a searched username. Integrated API calls to fetch and display user profiles, repositories, and other relevant information, providing a comprehensive view of GitHub user data.

Blog App - Built a dynamic blog app using React and Context API to fetch and manage data from an external API, providing a seamless user experience with efficient state management.

Shopping Cart App - Built a shopping cart app using Redux, enabling users to add and remove items, with automatic price calculation for the cart.

EdTech Front End - Developed a front-end application for an educational technology platform, featuring user authentication with login and signup forms, providing a streamlined interface for secure access and user management.

Discord Clone App - Developed a Discord clone using Tailwind CSS, replicating key UI features and layout for real-time chat functionality, delivering a responsive and modern design.

RazorPay Clone App - Developed a RazorPay clone using Tailwind CSS, replicating the UI design and providing a responsive, modern payment interface. Focused on creating a sleek, user-friendly layout with efficient styling and customization.
